Dear Google Hiring Team,
Gurgaon, New Delhi

I read and am interested about your advertisement in the May 05 2023 website for an Entry-level Software Engineer. Please accept this letter and the enclosed resume as my application for this position.

As a fresher from IIIT Allahabad, I have solid knowledge of a variety of operating systems, software development tools, and networking and file systems as well as practical experience in these areas. During my cooperative education placements, I had successful experience in developing and debugging C++ code.

When my classes required me to collaborate with other students on team projects, I was nearly always asked by my peers to organize the work and present the results. In addition, I found that my problem-solving skills were enhanced by working as part of a team and by considering other people's ideas.

Google is a leader in creating data storage solutions. This quality appeal to me greatly. I am actively seeking the kind of challenge offered by working for a technically innovative firm.

I am eager to have the chance to discuss this position with you in an interview. Please contact me at 91182235622. Thank you for your attention, and I look forward to hearing from you.

Sincerely,

Aryan Kumar
